

Caliper/Sizing Chart

Western has the right pot for you:

Choose from a wide selection of fiber pot sizes. The required container size will vary with the size of the rootball and the nurseryman's preference.

Plant Size "A"	Container*
12-15 in.	7X7 or 7X9
15-18 in.	8X6 or 8X8
18-24 in.	9X9SQ or 10X7
2-3 ft.	10X10 or 12X8
3-4 ft.	11X11SQ or 12X11
4-5 ft.	13X12 or 15X10
5-6 ft.	15X13 or 15X16
6-8 ft.	18X12 or 18X16
8-10 ft.	18X16 or 21X16

Caliper Size "B"	Container Size*
Up to 5/8"	11X11SQ or 12X11
5/8" to 3/4"	13X12
3/4" to 1"	15X13 or 18X16
1" to 1 1/4"	18X16 or 21X16
1 1/4" to 1 1/2"	21X16 or 24X18
1 1/2" to 2"	24X18
2" and up	30X22 or 36X22

*For more dimensional information please refer to Western Volume & Dimension Information sheet.

Handling Suggestions¹

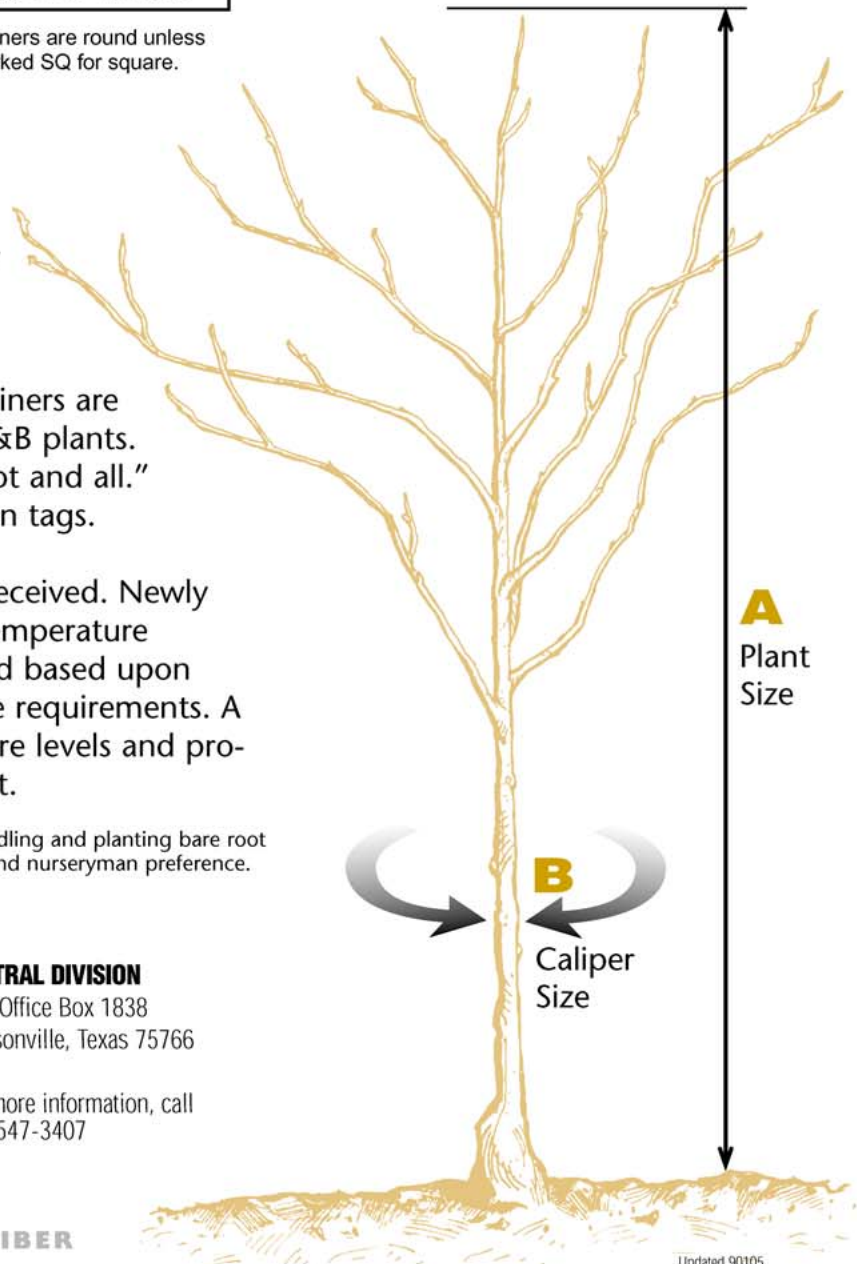

Be sure to check bare root plants upon arrival and rehydrate (moisten) roots if dried. Roots should never be allowed to freeze or dry out, and plants should be heeled in immediately in composted bark or aged sawdust.

Potting¹

Western's biodegradable molded fiber containers are ideal for early season sales of bare root or B&B plants. Immediate sales are possible by planting "pot and all." Contact Western for **free** planting instruction tags.

Nursery stock should be potted as soon as received. Newly potted material should be protected from temperature extremes. Soil mixtures have been developed based upon availability of raw materials and local climate requirements. A quality soil media will hold adequate moisture levels and provide support for plant and root development.

Containers are round unless marked SQ for square.

¹The above is a compilation of generally accepted methods for handling and planting bare root stock. Actual container sizes will vary depending on rootball size and nurseryman preference. This guide is provided for general reference, only.
